ProTecta Chain Lubricant

**Makes All Other
Chain Lubricants
Obsolete!**

“One of the best Chain Lubricants ever made”

- One Drop of ProTecta Chain Lubricant “WET” can withstand 80,000 pounds of pressure! So no matter how hard you push, ProTecta will maintain a film of lubricant even under the most extreme pressure.
- If you are looking for incredibly smooth operation and great equipment life then look no further!
- The unique needle stick applicator allows you to place one drop per link, exactly where you want it. No need to wipe off the excess — your rag doesn't need lubricating!
- With a temperature range from -50 to $+300$ °C you will get all season protection. No longer will your lubricant be sluggish on those cold winter mornings or weeping on a hot day in the tropics!
- ProTecta will resist wash off and facilitate corrosion prevention.
- ProTecta Chain Lubricant “DRY” will leave a completely dry microfilm that is not oily or sticky and will not pick up dust or build up a residue over time. Put it on when you come home so that it is ready to go next time.
- Its handy size allows you to easily store it in your saddle bag, even lying down, making it easy to access both when you are out on the road and at home.
- Don't just use it on your chain! It can also be used on your derailleur's and cables and thousands of other uses around the shed and house.
- Don't short change yourself, use what the best bike repairers and shops recommend - ProTecta Chain Lubricants!
