

ProTecta High Mileage Synthetic Formula

ProTecta High Mileage Synthetic Formula is designed for vehicles having more than 80,000 kilometers and SFR or ProTecta products have not been used regularly. High mileage vehicles accumulate deposits that create sludge, causing oil consumption and unsightly smoke. In addition seals can become hard and brittle and leak on to the ground. ProTecta High Mileage Synthetic Formula consists of a highly concentrated detergent/dispersant and anti-wear booster package to clean deposits and reduce wear, thus extending the life of your engine.

ProTecta High Mileage Synthetic Formula has been tested over a grueling (160,000 kilometer field trial) with outstanding results. ProTecta actually improves fuel economy and its advanced synthetic formula allows you to extend drain intervals. Use a bottle at least every 10,000 kilometers for optimum results.

BENEFITS:

- Reduces Oil Consumption
- Extends oil Change Interval
- Protects during engine start up
- Extends Engine Life
- Stops leaking seals
- Prevents Rings from Sticking
- Reduces smoke and emissions
