## ProTecta Hobby Lubricant

**Makes All Other  
Hobby Lubricants  
Obsolete!**

**“One of the finest  
Hobby Lubricants ever made”**

- One Drop of ProTecta Hobby Lubricant can withstand 80,000 pounds of pressure! So no matter how hard you work your RC, it will maintain a film of lubricant even under the most extreme pressure.
- If you are looking for incredibly smooth operation and great equipment life then look no further! Use it on bearings, pins, control rods and gears on your RC car, plane or boat. Also for model railroad journals, axles, trucks and couplers.
- The needle stick applicator allows you to place one drop exactly where you want it. No need to clean up the excess!
- With a temperature range from  $-50$  to  $+300$  °C you will get all season protection. No longer will your RC be sluggish on those cold winter mornings or weeping on a hot day in the tropics!
- You can use ProTecta Hobby Lubricant with complete confidence as its advanced synthetic formula won't swell rubbers or cause plastics to perish.
- It is light enough to use on bearings but also has an incredible desire to cling to metal making it suitable for gears and exterior components. One versatile product!
- ProTecta will resist wash off and is packed full of corrosion inhibitors.
- Its handy size allows you to easily store it in your tool box/bag, even lying down, making it easy to access both when you are racing and at home.
- Don't just use it on your RCs. It also has thousands of other uses around the shed and house.
- Don't short change yourself, use what the best operators and RC shops recommend - ProTecta Hobby Lubricant!
